

English Translation of Korean Patent Application No. 2003-5182

[ABSTRACT]

[ABSTRACT]

Disclosed herein is a microwave oven, which is provided  
5 with a toasting cavity in addition to a microwave cooking  
cavity, thus making well-toasted breads. The microwave oven  
includes a cabinet which is partitioned into a microwave  
cooking cavity, a toasting cavity, and a machine room. A  
microwave generating unit is installed in the machine room to  
10 irradiate microwaves into the microwave cooking cavity. A  
heating unit is installed in the toasting cavity to heat the  
toasting cavity. A ventilating unit functions to ventilate the  
toasting cavity.
